Book Condition: New. Publisher/Verlag: Springer, Berlin | A Window into the Future | This volume is one outcome of the 6th International Conference on Paleoceanography (ICP VI). The conference was held August 23-28, 1998 in Lisbon, Portugal. The meeting followed the traditional format of a small number of invited oral presentations complemented by a large number of contributed posters. Over 550 participants attended, representing thirty countries and nearly 450 posters were presented. The invited speakers addressed the main themes of the 5 oral sessions. The session topics were: Polar-Tropical and Interhemisphere Linkages; Does the Ocean Cause, or Respond to, Abrupt Climatic Changes?; Biotic Responses to Major Paleoceanographic Changes; Past Warm Climates; and Innovations In Monitoring Ocean History. This is the first time in ICP history that the Conference Proceedings are published. The aim of the organisers with the publication of this book is two-fold: to provide a useful review of the field and to document the ideas/controversies raised during the conference that may stimulate future work. The book reflects the initial intentions of the conference, but it is not a conventional conference proceedings, given that the papers have been reviewed by formal external referees. Each of the conference topics is introduced by a review article designed to summarize the state of the art in each theme followed by articles prepared by the invited speakers. As with most conference proceedings, each theme is covered heterogeneously. Some topics have all the expected contributions, others are less well covered. | Preface. Polar-Tropical and Interhemisphere Linkages: 1. Polar-Tropical and Interhemisphere Linkages: An Introduction; R Zahn. 2. The Overturning circulation of the glacial Atlantic: A view from the top; J. Lynch-Stieglitz, et al. 3. Atlantic alkenone sea surface temperature records: Low versus mid latitudes and differences between hemispheres; R.R. Schneider, P.J. Mueller. 4....
