The colonised portions of the coast of British North America contain many beautiful harbours of much commercial use, arid are more spacious and deep than the best of our much prized English ones. The tidal wave that sweeps to the north-east along the Atlantic coast of the United States, entering the funnel-like mouth of the Bay of Fundy, becomes compressed and elevated, as the sides of the bay gradually approach each other. In the narrow parts, the water rises at the rate of six or seven miles an hour, and the vertical rise of the tide amounts to sixty feet or more. The Hooghly in Hindostan, and the Severn in England, are also celebrated for their tidal waves, which are usually known as bores. 190. OPENINGS.--On the East, Gulf of St. Lawrence and Bay of...
