The retina is attached in two places, at the optic disc and at its anterior border, the ora serrata. It is not attached to the choroid, but simply lies on it. In examining the retina with the ophthalmoscope you will notice the optic disc on the nasal side, which marks the entrance of the optic nerve into the globe. The macula hitea, which is the most sensitive spot of the retina (sometimes called the yellow spot, as it is said to turn yellow after...
